The only local text in the market, Business Analysis and Valuation provides a framework for understanding and using financial statements for business students and practitioners. Developed specifically for students undertaking accounting valuation subjects, the text is unique in its approach which introduces and develops a framework for business analysis and valuation using financial statement data, then shows how to apply this framework to a variety of decision contexts. All chapters of this edition have been updated to include the latest regulations, practices and examples from both the financial markets and research. Industry insights from practitioners and other experts have been added to each chapter, giving students a practical, real-life understanding of how the content they are learning translates to the workplace. With an increased number of real-business Asia-Pacific case studies exploring various issues, including a running chapter example, and references to recent research in this field, the text offers local context and a practical and in-depth approach.

This book provides an easily accessible, computationally-oriented introduction into the numerical solution of stochastic differential equations using computer experiments. It develops in the reader an ability to apply numerical methods solving stochastic differential equations. It also creates an intuitive understanding of the necessary theoretical background. Software containing programs for over 100 problems is available online.

Now readers can learn how to conduct financial statement analysis most effectively by performing analyses on real-world companies. Wahlen/Baginski/Bradshaw's FINANCIAL REPORTING, FINANCIAL STATEMENT ANALYSIS, AND VALUATION, 9E provides a complete, balanced approach as the authors demonstrate how to
