This book attempts to demonstrate that only a genuine democratic dispensation can ensure its survival as a viable federation. Sartaj Aziz argues that the vitality of a nation comes primarily from the value system, cultural heritage, and social energy of its people.

It has been seven decades since the independent state of Pakistan was carved out of British India, yet the country is still in pursuit of a suitable constitutional framework. Over this period of time, no other country has experimented with so many different constitutional forms, from parliamentary democracy to presidential form of government, to outright military regimes. This book analyses constitutional development in Pakistan from its inception to present times. It provides a case-by-case account of constitution-making in Pakistan, with the inclusion of all pertinent documentation. Constitutional developments have been explained in the context of social and political events that shaped them. The book focuses on constitutional and political history, and constitutional development concurrently. It includes a liberal humanitarian reading of the travails of lawmakers and the role of generals, judges, politicians, and bureaucrats in the implementation of law. Students of law, political science, and history, as well as lawyers, judges, and professors will find this book of particular value. Being grounded in a socio-political context, this book is also of interest to the general reader. The third edition is updated to cover the constitutional and political developments up until 2013.

Pakistan in the Twentieth Century analyses both the vision and the reality of a South Asian polity. Beginning with an examination of the people and forces that shaped the construction of an independent and predominantly Muslim state within the subcontinent, this historical study describes the events and the work of the many personalities who influenced Pakistan's development in the fifty years following the transfer of power.

The Reconstruction of Religious Thought in Islam (1930) is Muhammad Iqbal's major philosophical work: a series of profound reflections on the perennial conflict among science, religion, and philosophy, culminating in new visions of the unity of human knowledge, of the human spirit, and of God. Iqbal's thought contributed significantly to the establishment of Pakistan, to the religious and political ideals of the Iranian Revolution, and to the survival of Muslim identity in parts of the former USSR. It now serves as new bridge between East and West and between Islam and the other Religions of the Book. With a new Introduction by Javed Majeed, this edition of The Reconstruction opens the teachings of Iqbal to the modern, Western reader. It will be essential reading for all those interested in Islamic intellectual history, the renewal of Islam in the modern world, and political theory of Islam's relationship to the West.

Seen through the lens of the outsider, Pakistan has often been reduced to a caricature. Its diversity and resilience have rarely figured in the single-issue focus of recent literature on the country, be it journalistic or scholarly. This book seeks to present an alternate paradigm and to contribute a deeper understanding of the country's dynamics that may help explain why Pakistan has confounded all the doomsday scenarios. It brings together an extra-ordinary array of leading experts, including Ahmed Rashid, Ayesha Jalal and Zahid Hussain, and practitioners, such as the book's editor, Maleeha Lodhi, Akbar Ahmed and Munir Akram. Together they debate their country's strengths and weaknesses and offer ways out of its current predicament. This book provides a picture of how Pakistanis see themselves and their country's faultlines and spells out ways to overcome these. Pakistan's political, economic, social, foreign policy and governance challenges are assessed in detail. So too is the complex interplay between domestic developments and external factors including great power interests that are so central to the Pakistan story and explain the vicissitudes in its fortunes. Lodhi and her contributors contend that Pakistan and its people have the capacity to transform their country into a stable, modern Muslim state, but bold reforms will be needed to bring about this outcome.

A complete and accessible overview of how politics and economics collide in a global context This text surveys the theories, institutions, and relationships that characterize IPE and highlights them in a diverse range of regional and transnational issues. The bestseller in the field, Introduction to International Political Economy positions students to critically evaluate the global economy and to appreciate the personal impact of political, economic, and social forces.

A Pulitzer Prize-winning husband-and-wife team speaks out against the oppression of women in the developing world, sharing example stories about victims and survivors who are working to raise awareness, counter abuse, and campaign for women's rights.

This book offers a comprehensive introduction to juvenile delinquency by defining and describing juvenile delinquency, examining explanations for delinquent behavior, and considering contemporary efforts to control delinquency through prevention and juvenile justice. The text cultivates an understanding of juvenile delinquency by examining and linking key criminological theories and research. Coverage includes: the historical origins and transformation of "juvenile delinquency" and juvenile justice; the nature of delinquency, addressing the extent of delinquent offenses, the social correlates of offending and victimization (age, gender, race and ethnicity, and social class), and the developmental patterns of offending; theoretical explanations of delinquency, with insights from biosocial criminology, routine activities, rational choice, social control, social learning, social structure, labeling, and critical criminologies; evidence-based practice in delinquency prevention and contemporary juvenile justice. Fully revised and updated, the new edition incorporates the latest theory and research in the field of juvenile delinquency and provides expanded discussion of contemporary juvenile justice reform, evidence-based practice in delinquency prevention, and disproportionate minority contact throughout the juvenile justice process. This book is essential reading for courses on juvenile delinquency and juvenile justice. The book is supported by a range of compelling pedagogical features. Each chapter includes key terms, learning objectives, an opening case study, box inserts that provide practical application of theory and research, critical thinking questions, suggested reading, useful websites, and a glossary of key terms. A companion website offers an array of resources for students and instructors. For students, this website provides chapter overviews, flasheards of key terms, and useful websites. The instructor site is password protected and offers a complete set of PowerPoint slides and an extensive test bank for each chapter—all prepared by the authors.
