The currency pairing is effectively a ratio of 1x, with x being the figure quoted as the price. So, if the figure rises to 1.400, it takes 1.400 dollars to buy a euro, in which case the value of your Euros in dollars will have increased. In a nutshell, this is the best way to think about forex transactions and the way in which they are priced.

Forex Trading - Learn to Trade Forex Like a Pro

The highly-leveraged nature of currency trading means that any profits realised from the trade can be magnified. Equally, so can the losses. If the currency you've invested in goes down in value instead of up, the potential losses you stand to make are amplified. Most investors put in place mitigation strategies to contain any losses.
