The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

A practical book written specifically for those studying for Stage 1 book-keeping and accounting syllabuses of the Royal Society of Arts, London Chamber of Commerce and Pitman examinations. Revision is built into the course and there are sample examination papers for further practice.

A wide-ranging source of information for the practicing accountant, The Ultimate Accountants' Reference, Third Edition covers accounting regulations for all aspects of financial statements, accounting management reports, and management of the accounting department, including best practices, control systems, and the fast close. It also addresses financing options, pension plans, and taxation options. The perfect daily answer book, accountants and accounting managers will turn to The Ultimate Accountants' Reference, Third Edition time and again for answers to the largest possible number of accounting issues that are likely to arise.
