activities that will allow students to work independently or in small groups to extend their knowledge and apply their skills. Each unit includes 13 to 14 attractive, reproducible worksheets and an assignment sheet, making this an easy way for instructors to provide challenging, enriching experiences for capable math students. This can also be used for review and remediation with middle school students. For a less advanced version of math extension activities, see Math Extension Units Book 1—place value, problem solving, time and measurement, and money. For more math units geared toward the same goal, see Enrichment Activities for Math Books 1, 2, and 3. Grades 4-5

Teach basic math skills like negative numbers, percentages, and decimals using word problems! Your students' reading skills will be strengthened as they learn basic math operations and critical thinking skills. The word problems included in this book are interesting enough to hold student attention, yet challenging enough to strengthen math skills. This book is designed to be completed by the student with little or no help from a parent or teacher which makes it a great resource for use at home or school.

When the teacher tells her class that they can think of almost everything as a math problem, one student acquires a math anxiety which becomes a real curse.

Designed to help classroom teachers provide enrichment for those students who quickly grasp the mathematical concepts being taught and are ready to move on to more challenging units. You had better not monkey around when it comes to place value. The monkeys in this book can tell you why! As they bake the biggest banana cupcake ever, they need to get the amounts in the recipe correct. There's a big difference between 216 eggs and 621 eggs. Place value is the key to keeping the numbers straight. Using humorous art, easy-to-follow charts and clear explanations, this book presents the basic facts about place value while inserting some amusing monkey business.
