With information on everything from on-gassing and off-gassing to first response interventions for medical problems, Diving Science is as essential as a wetsuit for your next dive.

Adventure writing at its best, Submerged is the first book on the remarkable story of America's elite underwater archeology team. Daniel Lenihan recounts experiences from his 25 years as founder and head of the award-winning Submerged Cultural Resources Unit (SCRU) team of the U.S. National Park Service, world-class divers - talented archeologists, historians, and photographers charged with the mission of surveying, mapping, investigating, and protecting shipwrecks and sites that constitute America's sunken heritage. In Submerged, Lenihan takes the reader on a kaleidoscope of the team's underwater experiences from 1975 to the present - from Florida caves to ancient ruins covered by reservoirs in the desert southwest; to a WWII Japanese submarine off the Alaskan coast; to the lower rings of hell to retrieve the bodies of drowned divers; to gripping accounts of personal survival in underwater caves, ships, and submerged buildings. Displaying a passion for extreme diving combined with disciplined professionalism as park ranger-archeologists, the SCRU team tackles astonishing, often harrowing assignments, including; The Isle Royale shipwrecks; Surveying ten large ships sunk from the mid-19th to mid-20th centuries in the middle of the frigid and deep Lake Superior. The USS Arizona in Pearl Harbor; Executing the largest mapping project ever conducted underwater, and his personal impressions as the first deep diver to explore and video the entire ship in 1983 Excavating the hull of the HL Hunley, the first submarine in history to sink an enemy ship, in Charleston Harbor during the Civil War Resurveying of the ships sunk by atomic bombs at Bikini Atoll, including the aircraft carrier USS Saratoga and Japanese battleship Nagato With an aggressive preservation ethic, the team discovers and documents shipwrecks from Florida to Alaska, and even studies the haunts of pirates and prehistoric cultures in Micronesia. This engaging book, written with a mixture of wonder, intensity, pathos and humor, records for the first time the historic and social significance of the underwater research programs conducted by this fascinating unit of the U.S. National Park Service. Sure to delight anyone interested in diving, archeology, American history, adventure, and rescue missions, this fast-paced volume brings an entirely new perspective to the marvels of America's underwater treasures.

Chris and Chrissy Rouse, an experienced father-and-son scuba diving team, hoped to achieve widespread recognition for their outstanding but controversial diving skills. Obsessed and ambitious, they sought to solve the secrets of a mysterious, undocumented World War II German U-boat that lay under 230 feet of water, only a half-day's mission from New York Harbor. In doing so, they paid the ultimate price in their quest for fame. Bernie Chowdhury, himself an expert diver and a close friend of the Rouses', explores the thrill-seeking world of deep-sea diving, including its legendary figures, most celebrated triumphs, and gruesome tragedies. By examining the diver's psychology through the complex father-and-son dynamic, Chowdhury illuminates the extreme sport diver's push toward—and sometimes beyond—the limits of human endurance.
