The Elemental Changes The Ancient Chinese Companion To The ...

In Bön or ancient Tibetan philosophy, the five elemental processes of earth, water, fire, air and space are the essential materials of all existent phenomena or aggregates. The elemental processes form the basis of the calendar, astrology, medicine, psychology and are the foundation of the spiritual traditions of shamanism, tantra and Dzogchen.

Classical element - Wikipedia

The ancient Greeks believed that there were four elements that everything was made up of: earth, water, air, and fire. This theory was suggested around 450 BC, and it was later supported and added to by Aristotle.

The Four Elements of Matter: Earth, Water, Air, Fire

According to ancient and medieval science, aether (*/ ˈ ɪ ? ? ? r ˌ/*), also spelled æther, aither, or ether and also called quintessence, is the material that fills the region of the universe above the terrestrial sphere. The concept of aether was used in several theories to explain several natural phenomena, such as the traveling of light and gravity.

Aether (classical element) - Wikipedia

The element of wood is associated with spring, a time of birth and new beginnings. "The wood element refers to living, growing entities: trees, plants and the human body," writes Elson M. Haas, MD, in *Staying Healthy With the Seasons* (Celestial Arts, 2003), his classic book about integrative medicine first published in 1981.
